NUMBER 1 JANUARY–FEBRUARY 1995

Computer-aided part program optimization of multi-component pallet residence time in a machining centre for canned cycles and cutter tool compensation
A. A. Afifi and D. R. Hayhurst 1

A two-robot printed circuit board assembly system
H.-C. Lin, P. J. Egbelu and C.-T. Wu 21

Generation of optimal operating strategies for robotic cells: a Petri net approach
H. M. Wang and H.-P. B. Wang 32

Representation of manufacturing systems in terms of entities and relationships
T. Beaumariage, C. Roberts and G. Baweja 43

Supervising conflicts in production management
J. Ayel 54

A methodology for machine tools error correction using reference parts
J. Mou and C. R. Liu 64

Book review 78

NUMBER 2 MARCH–APRIL 1995

Process-related simulation applied to manufacturing optimization
E. Rittershaus, F. Weinhold and H. K. Tönshoff 79

Minimizing total intercell and intracell moves in cellular manufacturing: a genetic algorithm approach
Y. P. Gupta, M. C. Gupta, A. Kumar and C. Sundram 92

A framework for part type selection and scheduling in FMS environments
L.-L. Tang, Y. Yih and C.-Y. Liu 102

Active coordination of a CIM multi-database system
O. Etzion, D. Dori and S. Y. Nof 116

Investigating the application potential of simulation to real-time control decisions
C. M. Harmonosky and S. F. Robohn 126

Experimental investigation of an FMS due-date scheduling problem: an evaluation of due-date assignment rules
I. Sabuncuoglu and D. L. Hommertzheim 133

A hybrid approach for real-time sequencing and scheduling
A. Jones, L. Rabelo and Y. Yih 145

Book reviews 155

NUMBER 3 MAY–JUNE 1995

Guest editorial
L. M. Camarinha-Matos 159

Towards a taxonomy of CIM activities
L. M. Camarinha-Matos, H. Pinheiro-Pita, R. Rabelo and J. Barata 160

A taxonomy for the materials handling and transfer environment
R. Karni and J. Rubinovitz 177

A dependability taxonomy for flexible manufacturing systems
A. Adlemo and S.-A. Andréasson 189

An exception-handling framework
A. Visser 197

A taxonomy of the monitoring of the execution of robot programs
V. Caglioti, D. Sorrenti and M. Danieli 204

A model-driven approach to enterprise integration
M. W. C. Aguiar and R. H. Weston 210

Toward a method for acquiring CIM ontologies
P. C. Benjamin, C. P. Menzel, R. J. Mayer and N. Padmanaban 225

Announcement 235

NUMBER 4 JULY–AUGUST 1995

Measuring sequence planning with dynamic programming
Z.-C. Lin and S.-C. Chen 237

Expert scheduling system for tool room operations
S. S. Shivathaya and X. D. Fang 247

Efficient solution for machine cell formation in group technology
B. Srivastava and W.-H. Chen 255

The effect of routeing and machine flexibility on the performance of manufacturing systems
S. Benjaafar, J. Talavage and R. Ramakrishnan 265

Minimal database for the determination of reliable cutting parameters in computer-aided manufacturing systems
B. Anselmetti, A. Chep and P. Mognol 277

Line balancing for non-traditional assembly lines, mixed models, and sequence-dependent assembly time
D. Ben-Arieh 286

An integrated approach for programming vision inspection cells
H. T. Redarce, Y. Lucas, C. B. Amar and S. Perrin 298

Book reviews 312

Announcement 314

NUMBER 5 SEPTEMBER–OCTOBER 1995

Application of object-oriented design concepts in CIM systems layout
Q. Barakat, K. Krishnasami and P. Banerjee 315

A shop floor controller class for computer-integrated manufacturing
J. S. Smith and S. B. Joshi 327

Simultaneous evaluation and selection of strategies for loading and controlling machines and material handling system in FMS
S. K. Maheshwari and S. K. Khator 340

A conceptual framework for shopfloor production activity control
P. Huguet and B. Grabot 357

Machine performance monitoring and proactive maintenance in computer-integrated manufacturing: review and perspective
J. Lee 370

Modelling and performance characterization of vision-assisted robotic cell for printed circuit board assembly
S. H. Cheraghi, P. J. Egbelu and E. A. Lehtihet 381

Book reviews 391

NUMBER 6 NOVEMBER–DECEMBER 1995

Decomposing solid models into depression and protrusion features
S. H. Chuang, Y. C. Tsai, C. Y. Du and C. S. Yang 393

Plan generation strategies for a knowledge-based automated process planning system
R. J. Mayer, U. Hari, C. J. Su and J. Yen 399

Feature-based modelling approaches for integrated manufacturing: state-of-the-art survey and future research directions
V. Allada and S. Anand 411

Re-engineering the product development cycle and future enhancements of the computer integrated environment
R. D. Caldwell, N. Ye and D. A. Urzi 441

A dynamic point specification approach to sequencing robot moves for PCB assembly
Y.-C. Su, C. Wang, P. J. Egbelu and D. J. Cannon 448

Book reviews 457
